Education	University	Institute	Year	CGPA
B.E CSD	Anna University	Karpagam College of Engineering	2026	8.05
HSC	State Board	KSV Matric Higher Secondary School	2022	8.4
SSLC	State Board	Mount Giris Matric Higher Secondary School	2020	9.4

SKILLS

Languages : Java , C , Python , HTML ,SQL.
Platforms & Tools : Figma , Visual Studio Code, GitHub, Eclipse, Pycharm.
Database & Frameworks : MongoDB ,Pandas , Numpy, React.

EXPERIENCE

AI ENGINEER INTERN - Prayag.ai [Jun 2025]*

- Developed and deployed AI-driven solutions leveraging advanced LLM architectures and agent systems for enterprise-level applications.
- Built and debugged planning agents using AgentSDK for NLP/LLM orchestration, implementing stepwise data aggregation and formatted response workflows.
- Developed advanced chatbot systems with OpenAI API (GPT-3.5, GPT-4) featuring intelligent function calling and multi-agent Orchestration.
- Designed and deployed MCP (Model Context Protocol) servers in FastAPI environments for seamless LLM context management
- Explored speaker diarization pipelines using pyannote.audio and AWS Transcribe for audio processing

Technologies Used: Python, FastAPI, MongoDB, OpenAI API, AgentSDK, FastMCP, AWS Transcribe.

INTERNSHIP [Sep 2023]

- **Completed a one-month internship at Navabharathi Computers**, applying technical and analytical skills to gain practical experience in Python programming and enhance proficiency in key concepts like syntax, data structures, and control flow.

KEY PROJECTS

Nanban Fund [Apr 2025]

- Developed a secure and user-friendly **chit fund management app** for friend-circle , with role-based access allowing users to register monthly payments via QR code and admins to monitor contributions and identify defaulters.
  Technologies Used: Node.js, MongoDB, React, JavaScript.

Salary Prediction [Feb 2025]

- Developed a **data-driven salary prediction model** using **Linear Regression**, enabling precise salary estimations based on candidate experience, test scores, and interview performance.
  Technologies Used: Python, Scikit-learn(linear Regression) , NumPy, Pandas.

House-Price Prediction [Feb 2025]

- Engineered a data-driven house price prediction model using Linear Regression, leveraging previous data to estimate approximate prices that enables buyers and sellers to make informed decisions by estimating property values.
  Technologies Used: Python, Scikit-learn(linear Regression) , NumPy, Pandas.

Short-Film Platform [Dec 2024]*

- Engineered an innovative platform enabling filmmakers to showcase short films and seamlessly connect with production houses for potential hiring opportunities.
  Technologies used: HTML, CSS, JavaScript.

Greenly [Nov 2023]

- Designed an intuitive tool to estimate daily household carbon emissions, utilizing **average mileage** and **approximate daily kilometers** from vehicle usage to suggest actionable ways to reduce emissions.
  Technologies used: HTML, CSS, JavaScript

CERTIFICATIONS

- Java - Netstack - [Oct 2024]
- JavaScript - IIT Bombay - [Mar 2024]
- Python - GUVI - [Oct 2023]
- Introduction to AI - Novitech - [Jul 2023]

ACHIEVEMENTS

- **Second Prize in UI Design Competition** [Mar '23]
  Earned **second place** in a competitive UI design challenge at Kongu Engineering College, outperforming 50 participants with creative and user-centered designs.
- Solved **240+ problems on Leetcode , 300+ problems across platforms** and earned the **Pandas badge** showcasing foundational data analysis skills.
- **HACKATHON** [Nov 2023]
  Led a team of 5 members to develop web-based solutions focused on environmental sustainability, using **HTML, CSS, and**
  Coordinated tasks, managed project timelines, and oversaw the presentation of the final prototype to the judges.
